HOMEWORK 15

1. Shelley has time to listen to exactly two Taylor Swift songs on her way to school. One song is 4.35 minutes long and the other is 3.48 minutes long. How long is Shelley's trip to school?

2. In Foxborough, the average snowfall in January is 3.21 inches. In March, the average snowfall is 4.15 inches. How much more does it typically snow in March than it does in January?

3. The Ahern Middle School cross country team, which has 25 runners on the team, has \$458 to spend on new uniforms. Each uniform cost \$19. Is there enough money to provide each runner with a new uniform? Why or why not?

4. Two ladybugs, Freda and Fred, are playing a game on a number line. Fred can jump three numbers at a time and Freda can only jump two. Fred starts at 1 and Freda starts at 30.

If they both jump together, who gets to 100 first? By how many jumps?
