## HOMEWORK 22

1. Josiah walked  $\frac{7}{12}$  mile each day for 3 days. How far did Josiah walk?

2. Brianna has  $\frac{1}{6}$  of a pie left from the weekend. She wants to take an equal amount of pie for the next four days. What fraction of the pie will she take each day?

3. Val was baking cakes for the bake sale. She originally thought she would need  $8\frac{2}{3}$  cups of flour so she took that amount out of her flour container. She only ended up using  $6\frac{3}{4}$  cups. How much flour did she have to put back in her container?

4. In Mrs. O'Keefe's class there are 32 students. Twenty-one of her students love math, 18 of them love history and 10 love both. How many of her students do not love math or history?
